1. Bookmarking was not finished – per email communication w/Norine, she'll take care of that this time due to my technology failures (thank you!!)
2. Valuation updated to 800K (890K was an old number, I missed that) on building application and fire form. Also note the 2024 fire valuation form was used.

STORMWATER

1. Please see uploaded communication documents 'email communication' and 'email communication 2' which demonstrates written permission from the PRGBA for the pipe (email comm 2 is the owners original email, and email comm is the associations response/approval – Reed did not include Nathan's original email in his response, so we wanted to show clearly that Nathan outlined the work and they had approved it and are working on the easement language).
