**RE: Tree Protection Addendum to March 25, 2025 arborist report for Zimmer
PN 4045000065**

To Whom It May Concern:

Tree #4 was shown on the original 2021 survey (Sheet 1 of 1 in the plan set, page number 2) as straddling the original storm drain and essentially surrounded by infrastructure including the boathouse, the stormwater outfall catch basin, and the foundation of the house. It was always assumed by this arborist that the tree would not be able to be retained due to impact concerns.

Once it was known that the storm drain would have to be replaced there was no question that the tree would be kept. The required excavation and trenching will run right through the tree.

Please let me know if you have any questions.
