---

Following up on our meeting today. I'm attaching a concept sketch that would include restriping the existing roadway to accommodate a left turn lane. The concept is intended to have no impact to the WSDOT intersection north of the access and is maximizing the existing curb to curb space near the intersection to avoid any widening. This provides back to back left turn lanes with no impact to the existing northbound left turn lane and would provide a 50' turn pocket for southbound left vehicles accessing the Frontage Road, which would accommodate the 95 percentile queue lengths. This would require a turn lane that is less than 12 feet wide given the width limitations. As we mentioned in our meeting, we are looking for a cost effective solution that can be approved and implemented in a timely manner in order for the school project to be feasible. We are looking for Public Works or the City's feedback on if this is viable option. After you have reviewed we would be happy to discuss at your earliest convenience.

Regards,  
Dan
