I would like to oppose the application for the installation of a cellular antennae and pole on the property near 4558 91st Ave. SE on Mercer Island. I have lived on Mercer Island for 47 years and value the natural environment that it offers and we all enjoy. This will take away from the natural beauty of Ellis Pond Park and disrupt the native wildlife (owl, frogs, ducks, heron, raccoons, etc.) that live there. Please do not allow this project to proceed. We need to protect our environment and the beautiful natural habitat that still exists for all to enjoy.

Thank you for your consideration and for preserving the beauty of Mercer Island.
