Subject: Ellis Pond G5 Cell Tower/ Pole

Hello,

We are residents in the Ellis Pond neighborhood- we live directly across the street from the pond. We are in earnest opposition to this project. The light will contribute to light pollution and I understand that the pole emits a buzzing noise.

Ellis Pond is a nature preserve that the community has been actively restoring over many years. This cell pole will most certainly degrade the environment. Barn owls and eagles frequent the area. What will be the impact on these raptors?

I urge the City Council to reject this location. The cell phone upgrades are neither needed or wanted. This particular placement will degrade the environment to a cherished natural park.

Sincerely,
Shelley and Bill Sage
