EMERGENCY PROCEDURES TO BE FOLLOWED

Project: #2409-065 – Residence at 4833 90th Ave SE, Mercer Island, WA 98040

To: Addison Cui / Jesse Tam

From: Contractor – C Swift Construction

1. Site Security

The contractor will immediately secure the perimeter of the slide area to prevent entry by unauthorized individuals, vehicles, or machinery.

2. Safety and Rescue

Authorized site personnel will visually inspect the area for any injured or trapped individuals. If any are found, the crew will immediately contact 911 to notify local fire and police departments.

3. Stabilization and Evaluation

The contractor will assess the site conditions and implement corrective measures to stabilize the affected area in coordination with: Garrett Dean Group Northwest Inc. – (425) 649-8757.

4. Utility and Infrastructure Inspection

Authorized personnel will inspect for any damaged or disrupted utility lines, drainage systems, or roadways. Any such damage will be reported to the appropriate local authorities, and access will be restricted until safe conditions are restored.

5. Structural and Perimeter Review

The crew will inspect the building foundation and surrounding accessible properties for any damage or ongoing slide risk, securing access where necessary to ensure safety.

6. Repair and Restoration

Once conditions are stabilized and confirmed safe, authorized personnel will begin immediate repair and stabilization work to restore the site as soon as possible.
