**DESIGN REVIEW – CODE OFFICIAL**

Design review is the process by which the City reviews the design of proposed development to ensure compliance with either design standards for the Town Center design ([MICC 19.11](#)), or for zones outside the Town Center ([MICC 19.12](#)). Development of property owned by the City, single family home development, and development of wireless communication facilities is not subject to design review ([MICC 19.16](#)). Any development that does not qualify as major new construction ([MICC 19.15](#) and [19.16](#)) is considered a minor exterior modification and subject to administrative design review. The code official has the authority to determine if a minor exterior modification is not significant and does not require formal design review.

**REVIEW PROCESS – TYPE II LAND USE REVIEW**

Type II reviews are based on clear, objective and nondiscretionary standards or standards that require the application of professional expertise on technical issues. Type II reviews require public notification of application and the decision is made by the Code Official. Type II reviews do not require a pre-application meeting, letter of complete application, notice of application mailing and posting, public comment period, public hearing, or notice of decision.

**PRE-APPLICATION MEETING– Recommended, but not required.**

A Pre-Application Meeting is used to determine whether a land use project is ready for review, to review the land use application process, and to provide an opportunity for initial feedback on a proposed application. Some land use applications require a pre-application meeting – in particular: short and long subdivisions, lot line revisions, shoreline permits, variances, and critical area determinations. The City strongly recommends that all land use applications use the pre-application process to allow for feedback by City staff.

For more information on the Pre-Application Meeting process, please refer to the [Pre-Application Meeting Request Form](#).
