Hello Paul,

The Department of Ecology (Ecology) received an email notification on August 16, 2023 from the U.S. Army Corps of Engineers' (Corps) indicating that they are reviewing the above project for authorization under Nationwide Permit (NWP) #27 and an LOP.

After reviewing the Section 401 Water Quality Certification (WQC) request received October 28, 2022, we notified the Corps that the project, as proposed in the WQC request, meets the requirements for Ecology's programmatic Section 401 WQC and Coastal Zone Management Act (CZM) Federal Consistency decision. This is to inform you that because your project meets Ecology's programmatic WQC, an individual WQC and CZM Federal Consistency **are not required**.

If the Corps sends a new notification that they intend to authorize the project under a different permit pathway, Ecology will notify you if a new WQC request will be required.

Please contact us if you have any questions at 360-407-6076 or e-mail ecyrefedpermits@ecy.wa.gov.

Thank you,

Brook Swensen (she/her)
Aquatic Permitting & Protection Section
