Subject: Support Proposed Zoning Change for the SJCC

Good afternoon Molly,

My family and I have been longtime members of the J, and it has been an important part of our lives and our experience raising a family in this community. Over many years, we have seen firsthand the positive impact the J has on Mercer Island, bringing people together and creating a welcoming place for families, children, and people of all ages. I value the J not only for its programs and opportunities, but also for the lasting relationships and strong sense of community it helps foster. It is a special place where generations can gather, stay active, learn, connect, and feel a true sense of belonging.

For more than 55 years, the J has served Mercer Island as a true community center, bringing people together and enriching the lives of residents across generations. Its longstanding presence and positive role in the community are well established, providing a welcoming place where people of all ages can connect, participate, learn, and grow.

I respectfully ask for your support of the proposed Commercial Office rezone for the SJCC property. Please recommend approval so the J can continue serve our community and thrive on Mercer Island for generations to come.

Regards,
Marty Lott
