Subject: objection to proposed project File No. SEP23-006

Dear Ryan,

Thank you for allowing us to comment on File No. SEP23-006. Based on our understanding of the City's plan, we are writing to object formally to the City of Mercer Island undertaking this proposed project. The culvert, which runs along the southern boundary of our property and for which we share private ownership and maintenance (i.e., the City neither owns nor maintains this culvert), is downstream from the waterway on which project construction would be performed. Should any aspect of the project either now or in the future (e.g., through erosion of the project's components, etc.) result in debris, such debris could enter and/or occlude our culvert. Any associated costs with a related incident will be borne solely by the private owners.

If you would like to discuss alternatives to the project as proposed and/or risk-mitigation strategies, please let us know.
Best,

Chris and Alexis Pallis
