**Subject:** File no. SEP23-005 - written objection

Ryan,

Thank you for the opportunity to comment on SEP23-005. Based on our understanding of the City's plan, we are writing to formally object. We share private ownership and maintenance of the culvert which runs along the southern boundary of our property and is downstream from the watercourse on which the project construction would be performed. We are concerned that debris from the project will travel downstream and obstruct our culvert, either during channel stabilization or after the work is completed. In the past, obstruction to our culvert caused by debris from construction has resulted in flooding. As private owners of the culvert, we bear responsibility for any costs incurred for clean up and damages which can be substantial.

Please let us know if you would like to discuss alternatives to the project as proposed or risk mitigation.

Best,  
Chris and Alexis Pallis
