

Demopulos Pile Repair

Project Narrative

Repair six wood piles supporting a boat cover and pier by splicing the piles. The piles will be cut off at the low lake level and a new untreated cedar stub will be attached with a steel collar. The project will be completed with a barge and hand tools.

The proposed project is categorically exempt from SEPA per WAC 197-11-800 (3) as it is repair of an existing structure. Repair of piling is explicitly stated as being exempt from SEPA in the before mentioned WAC section.
