

**JARPA – Not Required**

The proposed residential project is located on a waterfront parcel on Mercer Island and involves no in-water work, no proposed structures or impervious areas within the designated shoreline setback, and qualifies as categorically exempt from SEPA. All work will occur upland of the Ordinary High Water Mark (OHWM) and entirely outside regulated buffers. The scope of work does not trigger any local, state, or federal permits requiring coordination through the Joint Aquatic Resources Permit Application (JARPA) process. As such, no JARPA form is warranted for this exemption request.

Please feel free to contact our office with any questions or concerns.

Kind regards,

**Dan Buchser** VP, Senior Design Manager
