**Subject:** regarding SHL25-037 & SEP25-020

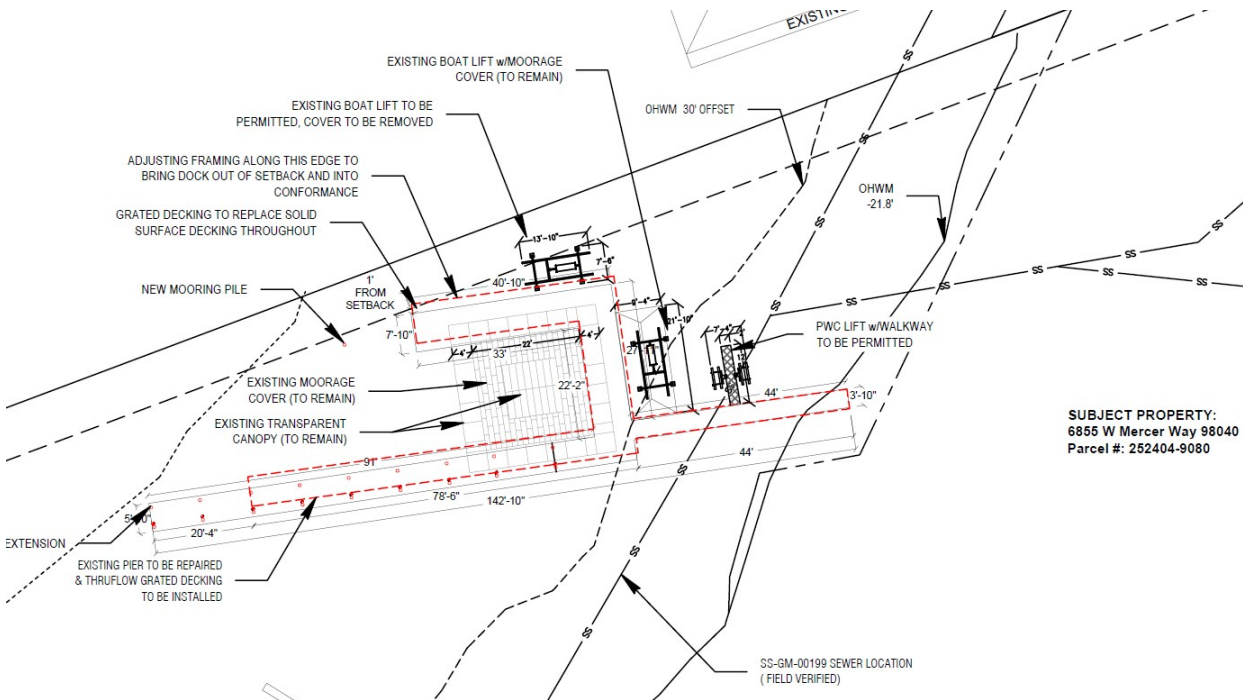

Dear Ms. McGuire,

I received today in mail the public notice of application related to file SHL25-037 & SEP25-020. I have a question and hope you can help clarify.

In file "Plan set 12-02-2025.pdf", it had this drawing as part of the "existing conditions":

However, this drawing does not appear to reflect the actual site conditions. In reality, there is no 'existing' pier as depicted. When the dock was constructed in 2021, it was not located within the 10-foot setback. Please see the attached City decision dated July 19, 2021, for reference. The approved configuration is shown below:

Please let me know if I have misunderstood. I would want to ensure that no new pier is constructed within the 10-foot setback or represented as an "existing dock to be repaired."

Thank you.
