

Evergreen Permits

3/10/2026

Project Narrative

The Hartley Re-roof project consists of the replacement of the existing roof at 8410 Benotho PI, Mercer Island, WA 98040, with a construction valuation of \$14,000. The property is located near the lake, and the permit application was previously submitted under Permit Application No. 2510-189; however, the City of Mercer Island has requested additional information before final approval, including documentation related to shoreline exemption and any other applicable review items. Evergreen Permits is assisting with preparation of the required response materials, coordination of any supplemental documentation, and resubmittal to address reviewer comments and secure permit approval for the reroofing work.
