SHORT SUBDIVISION – FINAL APPROVAL

After the code official grants preliminary approval for a short subdivision and all conditions of preliminary approval and installation of any required plat improvements are completed, the applicant may submit for final approval of the short subdivision. Once the short subdivision has received preliminary approval, the applicant has **five years** to submit a final plat that meets all requirements of Chapter 19.08 Mercer Island City Code (MICC), Subdivision Regulations. A short plat that is not recorded within five years after its preliminary approval shall expire, becoming null and void.

REVIEW PROCESS – TYPE II LAND USE REVIEW

Type II reviews are based on clear, objective and nondiscretionary standards or standards that require the application of professional expertise on technical issues. Type II reviews require public notification of application and the decision is made by the Code Official. Type II reviews do not require a pre-application meeting, letter of complete application, notice of application mailing and posting, public comment period, public hearing, or notice of decision.

PRE-APPLICATION MEETING

A Pre-Application Meeting is used to determine whether a land use project is ready for review, to review the land use application process, and to provide an opportunity for initial feedback on a proposed application. Some land use applications require a pre-application meeting – in particular: short and long subdivisions, lot line revisions, shoreline permits, variances, and critical area determinations. The City strongly recommends that all land use applications use the pre-application process to allow for feedback by City staff.

For more information on the Pre-Application Meeting process, please refer to the [Pre-Application Meeting Request Form](#).
