**LOT LINE REVISION**

A Lot Line Revision (LLR) is an adjustment of boundary lines between existing lots that does not create any additional lots and which does not reduce the area of any existing lot to the point that it fails to meet minimum development code requirements for area and dimensions. A LLR can also be used to consolidate two or more lots into a single lot through the removal of shared lot lines.

**REVIEW PROCESS – TYPE II LAND USE REVIEW**

Type II reviews are based on clear, objective and nondiscretionary standards or standards that require the application of professional expertise on technical issues. Type II reviews require public notification of application and the decision is made by the Code Official. Type II reviews do not require a pre-application meeting, letter of complete application, notice of application mailing and posting, public comment period, public hearing, or notice of decision.

**PRE-APPLICATION MEETING**

A Pre-Application Meeting is used to determine whether a land use project is ready for review, to review the land use application process, and to provide an opportunity for initial feedback on a proposed application. Some land use applications require a pre-application meeting – in particular: short and long subdivisions, lot line revisions, shoreline permits, variances, and critical area determinations. The City strongly recommends that all land use applications use the pre-application process to allow for feedback by City staff.

For more information on the Pre-Application Meeting process, please refer to the [Pre-Application Meeting Request Form](#).
