Trip generation per the Institute of Transportation Engineers Trip Generation Manual 11th Edition

* - Pass-by rates per ITE, local Agency data and Traffic Engineering Experience. The site would have some nominal pass-by traffic, mail, garbage and service/delivery type trips. No refinement for the pass-by traffic is taken for the proposed residential use

Notes: Due to rounding some values may not add up and per stadard accounting convention number in (parenthesis) are negative values

A vehicle trip is defined as a single or one direction vehicle movement with either the origin or destination (exiting or entering) inside the study site. The above trip generation values account for all the site trips made by all vehicles for all purposes, including commuter, visitor, recreation, and service and delivery vehicle trips.
